**News You Can Use!**

**Visit us on the WEB!!**

We are pleased to announce the launching of our new website! It is totally redone, so please visit us at [www.fssprotect.com](http://www.fssprotect.com). You will find some interesting facts that we would like to share with you. We will be updating it with new information periodically. So visit often!

**CONTEST!!!!**

We are building our email database so that we can contact you more efficiently. Please click on the "Contact Us" tab and complete the form. When we receive your information, your name will go into our monthly drawing for a free month of monitoring! The first winner will be notified at the beginning of November. So email your address today! Also, while you are there, if you have any questions, just ask! We will get back to you as soon as possible.

**Thank you for your Business!**

## Stay Safe this Holiday Season with the following Tips!

### Fire Tips

- To prevent carbon monoxide poisoning, have your fuel-burning appliances checked by a qualified technician.
- Practice fire safety during the Holidays. Keep candles away from decorations. Also, whenever possible, use flame retardant or non-combustible decorations.
- Check Holiday lights prior to hanging. Replace broken bulbs and light strands if you find exposed wire.
- Don't overload extension cords with more plugs than allowed.
- Turn off all Holiday lights prior to leaving the house or going to bed.
- Add fire detection devices to your monitored system, if there is a problem, the alarm will sound and the fire department will be alerted while you are away.

### Security Tips

- More than half the residential burglaries occur during the daytime hours. Be extra cautious about locking doors and windows and don't forget to arm your Alarm System!
- Don't invite burglars in with a tempting display of holiday gifts that can be seen from the outside.
- Create the illusion that someone is home by leaving lights, a radio, or the TV on.

A Note from the editor:

Every year there are more than 383,000 fires in the U.S. Don't let your business or home become one of these statistics! Adding monitored fire detection enhances your local smoke detectors and will protect your property without being there.
